

Laporan ManualBook FRONTEND-ADMIN

Nama : Setiawan Rifaldo

NPM : 20312006

- Disini saya sebagai frontend-admin akan membuat tampilan admin, yang berisi tampilan tambah data produk, tampilan tambah data kategori barang, tampilan tambah data merek, dan tampilan tambah data user.

```
10 <!-- <link nhref= {{ asset('template/backend/sb-admin-2')}}/vendor/fontawesome-free/css/all.min.css rel= stylesheet" -->

28 </head>
29
30 <body id= "page-top">
31
32 <!-- Page Wrapper -->
33 <div id= "wrapper">
34
35 <!-- Sidebar -->
36 @include('layout.sidebar')
37 <!-- End of Sidebar -->
38
39 <!-- Content Wrapper -->
40 <div id= "content-wrapper" class= "d-flex flex-column">
41
42 <!-- Main Content -->
43 <div id= "content">
44
45 <!-- Topbar -->
46 @include('layout.navbar')
47 <!-- End of Topbar -->
48
```

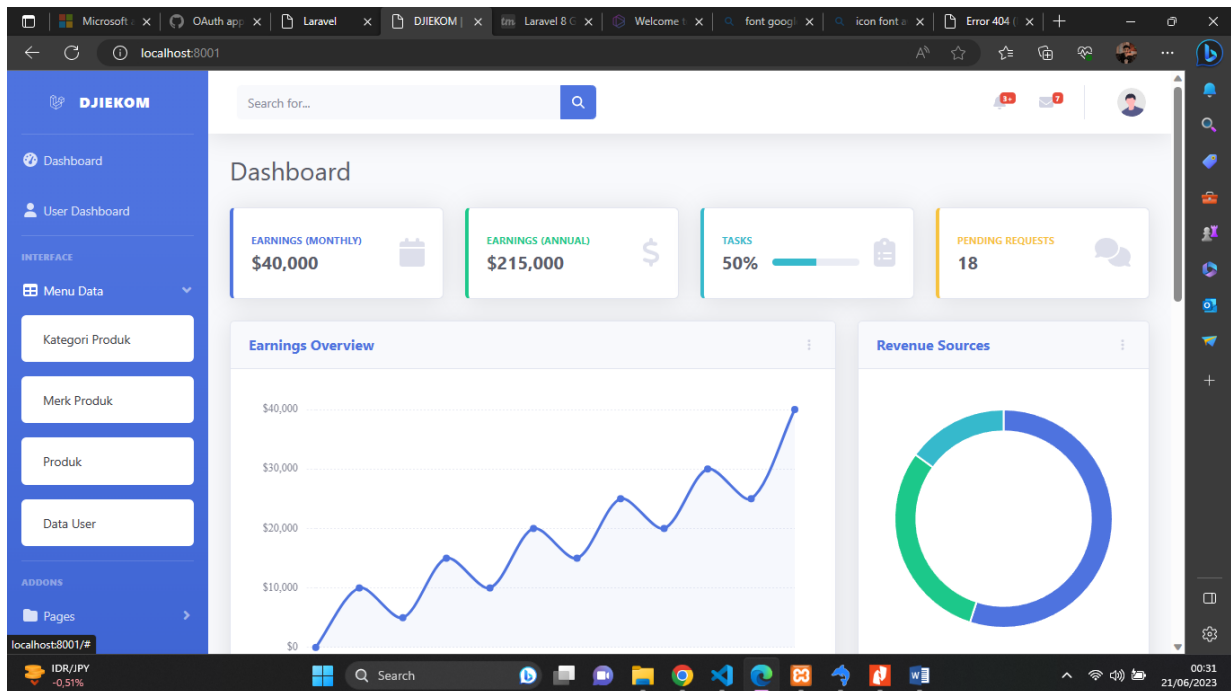

- Pertama saya Membuat template yang berisikan header dan footer untuk template tampilan home awal.

```
1 @extends('home',[
2     'title' => 'Dashboard',
3     'pageTitle' => 'Dashboard'
4 ])
5 @section('content')
6 <!-- Content Row -->
7 <div class="row">
8
9
10 <!-- Earnings (Monthly) Card Example -->
11 <div class="col-xl-3 col-md-6 mb-4">
12 <div class="card border-left-primary shadow h-100 py-2">
13 <div class="card-body">
14 <div class="row no-gutters align-items-center">
15 <div class="col mr-2">
16 <div class="text-xs font-weight-bold text-primary text-uppercase mb-1">
17 Earnings (Monthly)</div>
18 <div class="h5 mb-0 font-weight-bold text-gray-800">$40,000</div>
19 </div>
20 <div class="col-auto">
21 <i class="fas fa-calendar fa-2x text-gray-300"></i>
22 </div>
23 </div>
24 </div>
25
26 <!-- Earnings (Monthly) Card Example -->
27 <div class="col-xl-3 col-md-6 mb-4">
28 <div class="card border-left-success shadow h-100 py-2">
29 <div class="card-body">
30 <div class="row no-gutters align-items-center">
31 <div class="col mr-2">
```

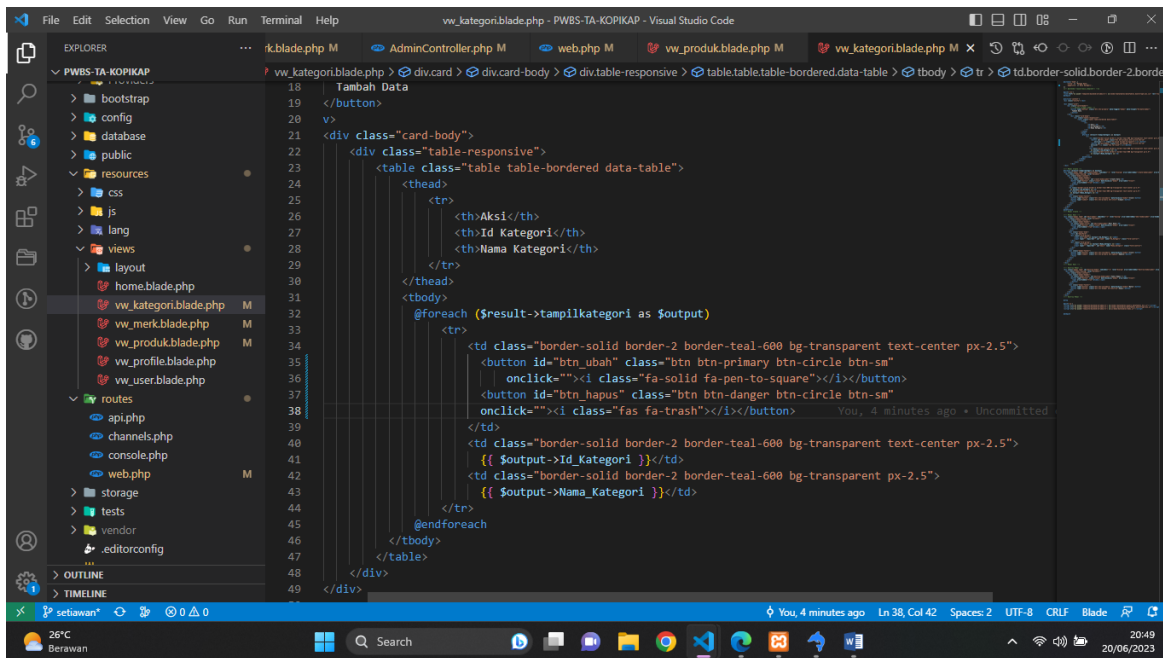

- Selanjutnya membuat tampilan dashboard membuat file baru dashboard.blade.php

```
30 <div class="sidebar-heading">
31 Interface
32 </div>
33
34 <li class="nav-item">
35 <a class="nav-link collapsed" href="#" data-toggle="collapse" data-target="#collapseOne"
36 aria-expanded="true" aria-controls="collapseOne">
37 <i class="fas fa-fw fa-table"></i>
38 <span>Menu Data</span>
39 </a>
40 <div id="collapseOne" class="collapse aria-labelledby="headingTwo" data-parent="#accordionSidebar">
41 <div class="bg-white py-2 collapse-inner rounded">
42 <a class="collapse-item" onclick="user()">Data User</a>
43 </div>
44 </div>
45 <div id="collapseOne" class="collapse aria-labelledby="headingTwo" data-parent="#accordionSidebar">
46 <div class="bg-white py-2 collapse-inner rounded">
47 <a class="collapse-item" onclick="produk()">Produk</a>
48 </div>
49 </div>
50 <div id="collapseOne" class="collapse aria-labelledby="headingTwo" data-parent="#accordionSidebar">
51 <div class="bg-white py-2 collapse-inner rounded">
52 <a class="collapse-item" onclick="kategori()">Kategori Produk</a>
53 </div>
54 </div>
55 <div id="collapseOne" class="collapse aria-labelledby="headingTwo" data-parent="#accordionSidebar">
56 <div class="bg-white py-2 collapse-inner rounded">
57 <a class="collapse-item" onclick="merk()">Merk Produk</a>
58 </div>
59 </div>
60 </li>
```

- Kemudian saya membuat file baru dengan nama sidebar.blade.php ,disini saya membuat button user, produk, kategori, dan merk untuk menampilkan datanya.

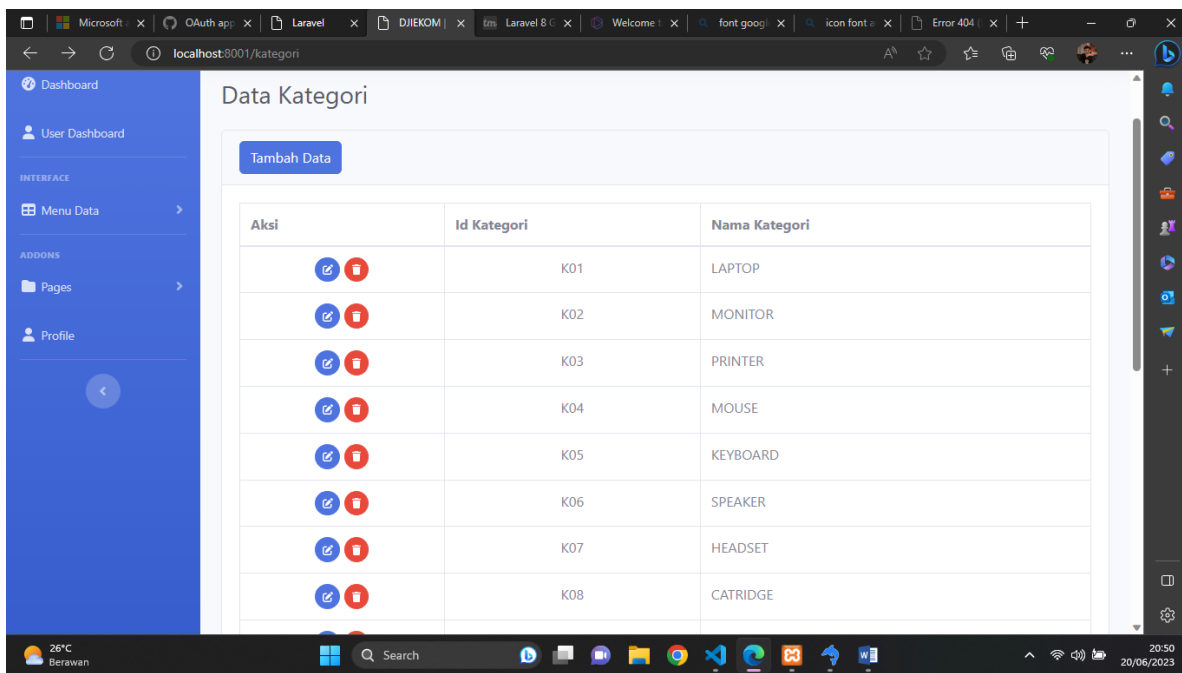

- Ini adalah Tampilan menu awal yang berisikan dashboard, user dashboard, menu data yang terdiri dari : menu kategori produk, merk produk, produk, user data

```
18 Tambah Data
19 </button>
20 </div>
21 <div class="card-body">
22 <div class="table-responsive">
23 <table class="table table-bordered data-table">
24 <thead>
25 <tr>
26 <th>Aksi</th>
27 <th>Id Kategori</th>
28 <th>Nama Kategori</th>
29 </tr>
30 </thead>
31 <tbody>
32 @foreach ($result->tampilkategori as $output)
33 <tr>
34 <td class="border-solid border-2 border-teal-600 bg-transparent text-center px-2.5">
35 <button id="btn_ubah" class="btn btn-primary btn-circle btn-sm"
36 <onclick=""><i class="fa-solid fa-pen-to-square"></i></button>
37 <button id="btn_hapus" class="btn btn-danger btn-circle btn-sm"
38 <onclick=""><i class="fas fa-trash"></i></button>
39 </td>
40 <td class="border-solid border-2 border-teal-600 bg-transparent text-center px-2.5">
41 {{ $output->Id_Kategori }}</td>
42 <td class="border-solid border-2 border-teal-600 bg-transparent px-2.5">
43 {{ $output->Nama_Kategori }}</td>
44 </tr>
45 @endforeach
46 </tbody>
47 </table>
48 </div>
49 </div>
```

- Kemudian buat file baru dengan nama vw_kategori.blade.php, disini vw_kategori adalah tampilan untuk menampilkan data kategori produk.

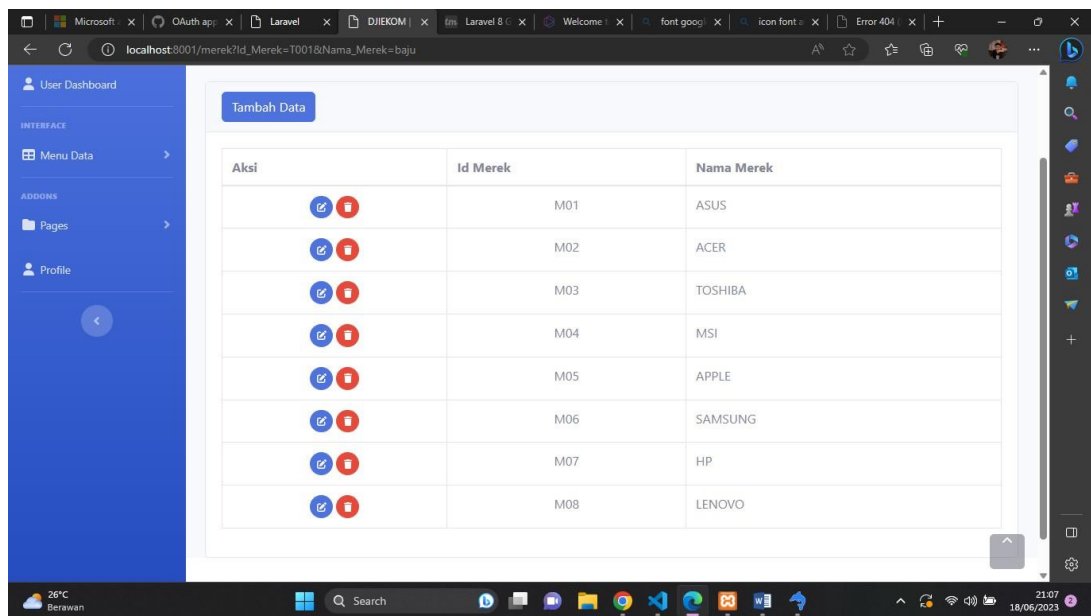

- Ini adalah tampilan data vw_kategori yang menampilkan data kategori produk

```

vw_merk.blade.php M AdminController.php M web.php M
FRONTEND-ADMIN > app > Http > Controllers > AdminController.php > AdminController > insert
82 {
83     // tampilkan view "vw_profile"
84     return view("vw_profile");
85 }
86
87 // buat fungsi untuk simpan data
88 function insert(Request $req)
89 {
90     // untuk post data ke server
91     $url = env("API_URL")."insert";
92
93     // ambil service "post" dari server
94     $request = $this->client->post($url,[
95         "form_params" => [
96             "Id_Merek" => $req->Id_Merek,
97             "Nama_Merek" => $req->Nama_Merek
98         ]
99     ]);
100
101     // menampilkan hasil dari post server
102     $response = $request->getBody();
103
104     echo $response;
105 }
106
107 // fungsi untuk hapus data merek
108 function delete($parameter)
109 {
110     $kode = base64_encode($parameter);
111     // url untuk delete dari data server
112     $url = env("API_URL")."delete/".$kode;
113 }
```

- Membuat fungsi create data, dengan membuat fungsi insert untuk simpan data

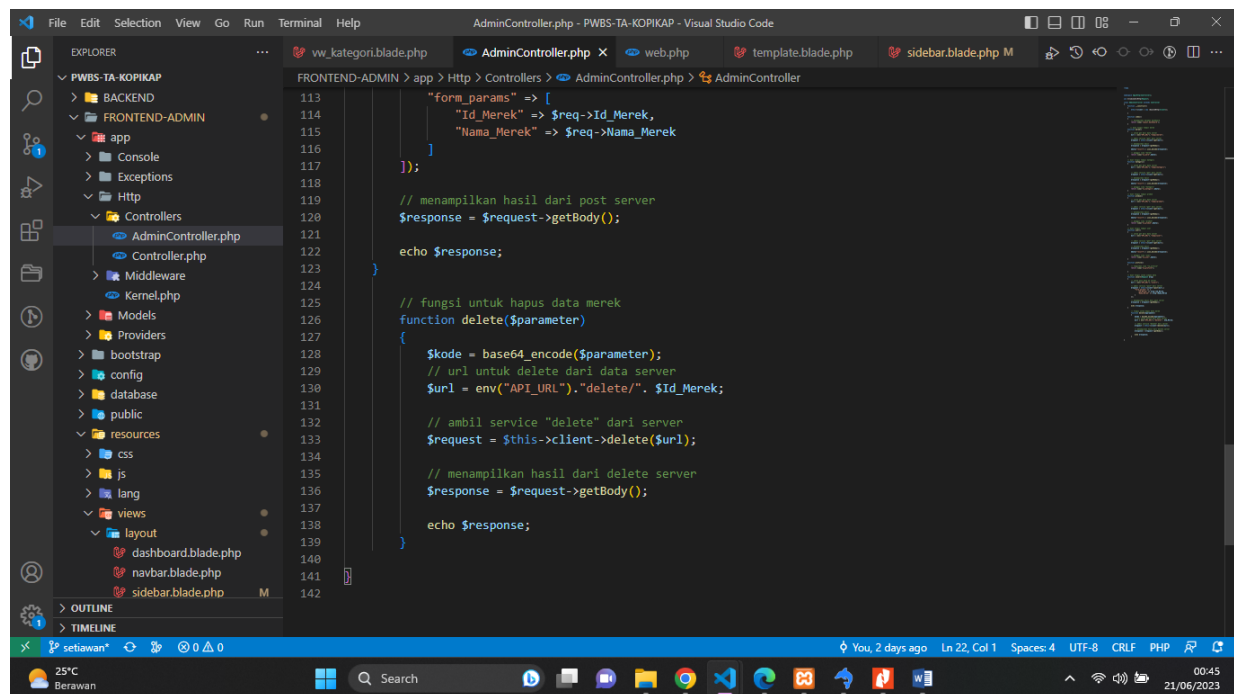

- tampilan create data

The screenshot shows a Visual Studio Code editor with the file `AdminController.php` open. The code defines a function `saveDataMerek` that uses `async/await` to send a POST request to a server endpoint. The request body contains `Id_Merek` and `Nama_Merek`. The function also includes error handling with an `alert` message.

```
201 // ...
202
203
204 // bust fungsi save data (Metode async/await)
205 const saveDataMerek = async (Id_Merek, Nama_Merek) => {
206   // collecting data
207   let data = {
208     "Id_Merek" : Id_Merek,
209     "Nama_Merek" : Nama_Merek,
210   }
211
212   // proses kirim data
213   try {
214     // kirim data ke controller
215     // await fetch(url,atribut)
216     let response = await fetch(`${url}/insert`),{
217       method: "POST",
218       headers: {
219         'Content-Type': 'application/json',
220         'X-CSRF-Token': document.querySelector('meta[name="token"]').content
221       },
222       body: JSON.stringify(data)
223     })
224     // baca hasil dari controller
225     let result = await response.json()
226     alert(result.pesan)
227
228   } catch (error) {
229     alert("Data Gagal Dikirim !")
230   }
231 }
232
```

- Script save data

The screenshot shows the same Visual Studio Code editor with `AdminController.php` open. It displays the `delete` function, which takes a parameter, encodes it, and sends a DELETE request to the server. It also includes error handling and a response echo.

```
113 "form_params" => [
114   "Id_Merek" => $req->Id_Merek,
115   "Nama_Merek" => $req->Nama_Merek
116 ];
117
118 // menampilkan hasil dari post server
119 $response = $request->getBody();
120
121 echo $response;
122
123 // fungsi untuk hapus data merek
124 function delete($parameter)
125 {
126   $kode = base64_encode($parameter);
127   // url untuk delete dari data server
128   $url = env("API_URL")."delete/" . $Id_Merek;
129
130   // ambil service "delete" dari server
131   $request = $this->client->delete($url);
132
133   // menampilkan hasil dari delete server
134   $response = $request->getBody();
135
136   echo $response;
137 }
138
139
140
141
142
```

- Membuat fungsi untuk hapus data, dengan membuat function delete untuk menghapus data
